CONINVERS®

New Edition Main Product Line Catalog on CD-ROM

Effective immediately the new, revised main product line catalog is available on CD-ROM. The contents of the new "Main Catalog Signal Connectors/Sensor-Actuator Connectors" has been reworked and is completely new. Besides information about the known M23/M27 Signal Connectors the user gains information about the new TU series, a signal connector family up to 19 pole positions with bayonet locking, or the plastic molded M16 connectors in either socket or pin version. The latter represents the new product series called KPV.

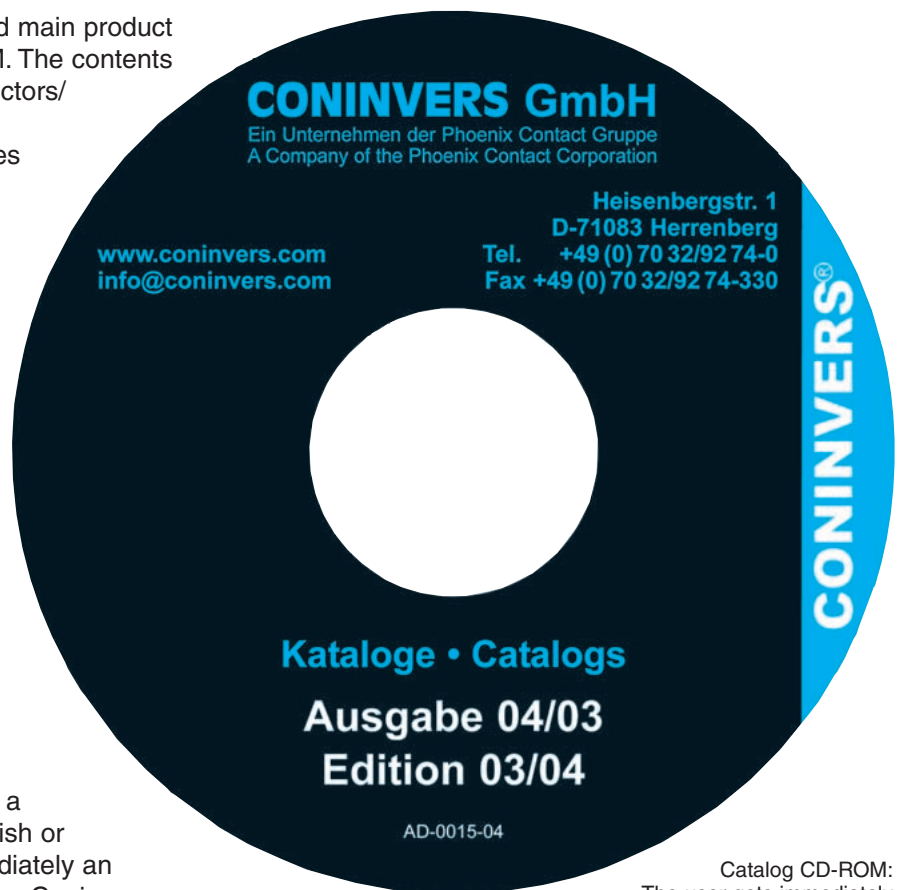

New is also a product code index which allows to assign each product code to a page inside the catalog with the product information in detail.

At a Glance

Once the CD-ROM drive is loaded the program starts to run automatically. No installation tasks are needed.

All connectors are easily accessible via a contents list with options for either English or German language. The user gets immediately an overview on the brought product program Coninvers offers to its customers:

- Signal and Sensor-Actuator connectors ranging from M8 to M27 and bayonet locking
- Power connectors M23
- Plastic molded versions M16/M23/M27
- Extensions, couplers and wall bushings
- Connectors applying the Piercecon® Quick Termination Technology.
