

## New insertion and removal tools

### Handling Ø 1 mm / Ø 2 mm series RC crimp contacts more comfortable

The tool simplifies insertion and unlocking of the RC male/female crimp contacts with plug-in diameters of 1 mm and 2 mm.

After crimping the contacts to the wires, the crimp contacts can very easily be inserted into the contact inserts and safely locked. For maintenance purposes, the tool can also be used for unlocking the contacts easily.

The series RC Ø 1 mm / Ø 2 mm crimp contacts are used with 6 to 17 position Coninvers M23 signal connectors of the series NC, RC, RM and UC as well

as in series TU bayonet connectors. The concerning crimp contact inserts are named with the type description "RC-....N8A....".

The new insertion and removal tools can be obtained using the following article numbers:

- Tool for Ø 2 mm crimp contacts: **RC-Z2490**.  
It replaces the existing tool RC-Z2220.
- Tool for Ø 1 mm crimp contacts: **RC-Z2494**.  
It replaces the existing tool RC-Z2097.
